---------------------	----------------------	---------------------------------	---------------------------------	----------------------------------	----------------------------	----------------------------------	--	-------------------------------------	--------------------------------	--------------

An analytical review of 7,000+ incidents tailored for the **City Council Budget Committee** and the **Civilian Oversight Board**. This presentation addresses geographic hotspots, demographic disparities, and situational protocols.

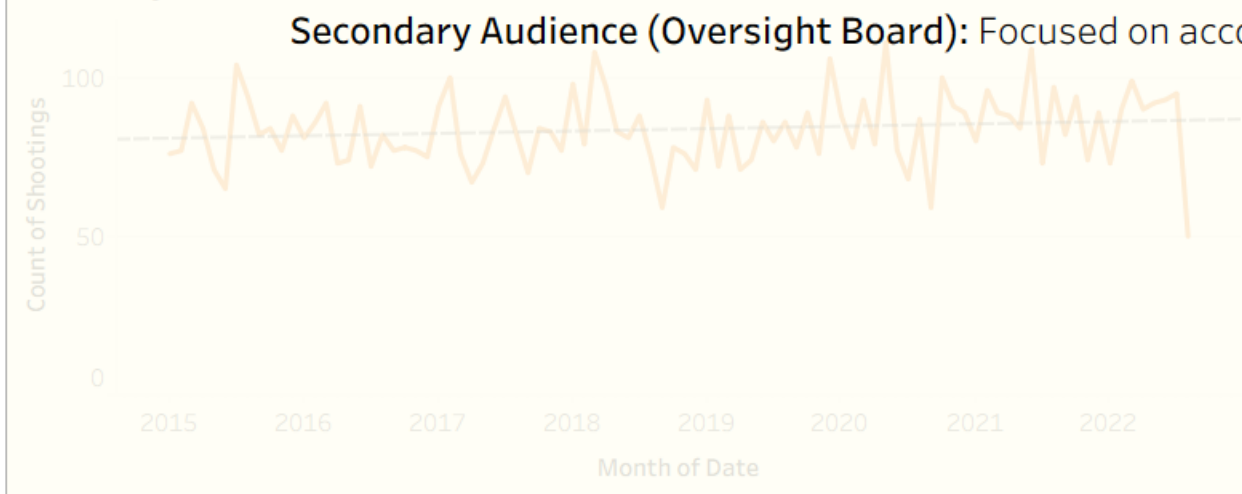

Macro-Level Policy View

Incident Density

Primary Audience (Policy Makers): Focused on budget allocation, training efficiency, and regional crime trends.

Monthly Incidents

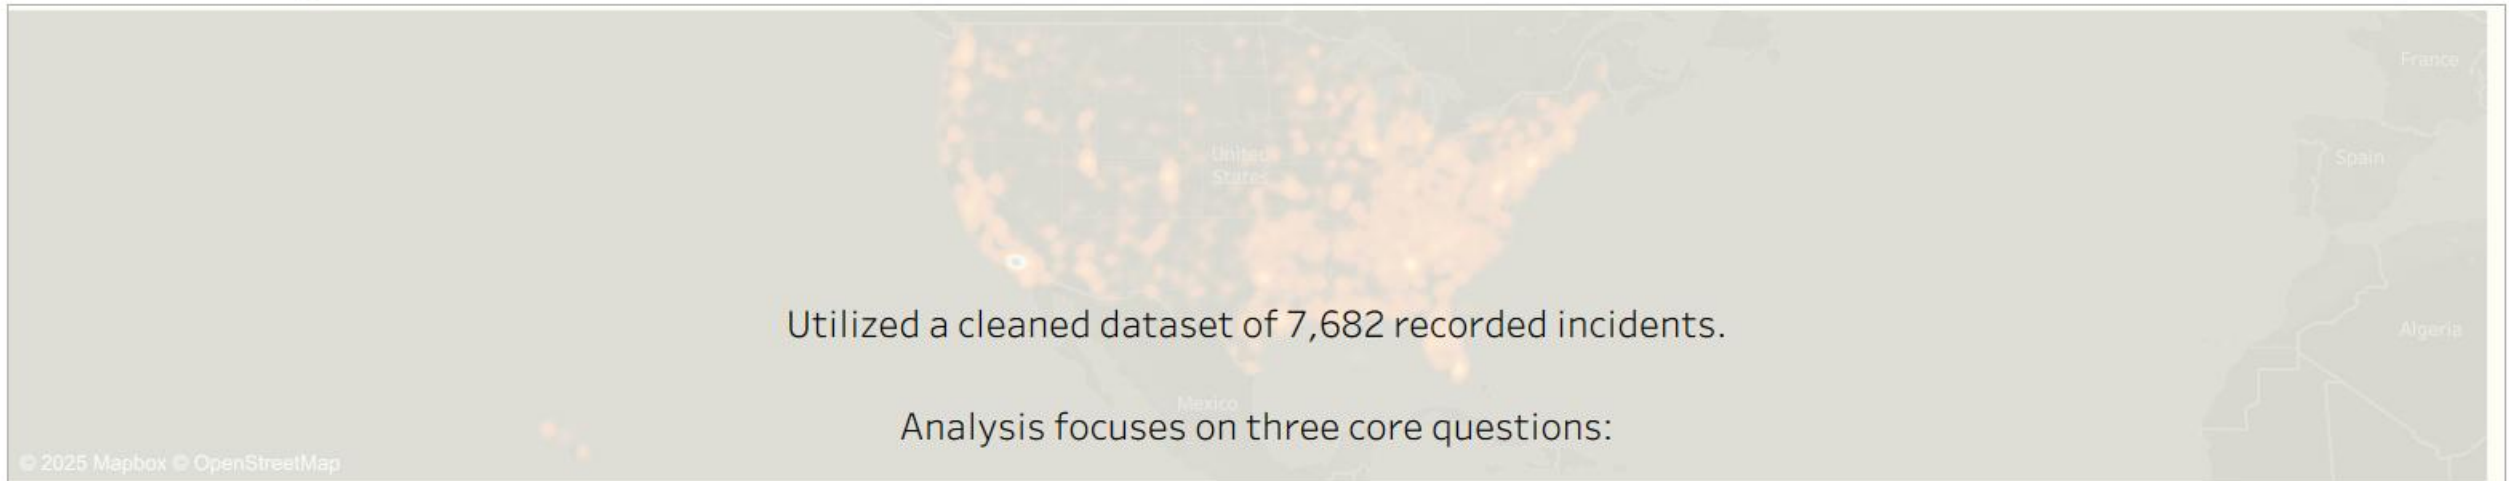

Secondary Audience (Oversight Board): Focused on accountability, racial bias, and mental health crisis response.

-----------------------	----------------------------------	--	-------------------------------------	--------------------------------	-----------------------------------	-----------------------------------	---------------------------------	---------------------------------	---------------------------------------	-------------------------

Over 95% of subjects are male (Left side). However, the female distribution (Right side) skews slightly older and often correlates with 'Crisis' events rather than violent crime.

---------------	-------------------------------------	--------------------------------	-----------------------------------	-----------------------------------	---------------------------------	---------------------------------	---------------------------------------	-------------------------------------	-------------------	----------------------------

A significant portion of shootings occur when the subject is 'Not Fleeing.' However, 'Car' and 'Foot' pursuits introduce high-adrenaline variables that increase lethal outcomes.

RQ1: Outlie..	RQ2: White and Black civilians ar..	RQ2: Younger demographics fa..	RQ2: The gender gap is overwhel..	RQ2: 'Attack' levels vary by de..	RQ3: Firearm prevalence dicta..	RQ3: Mental health crises acc..	RQ3: Fleeing does not always correl..	RQ3: Body camera usage remains in..	Executive Summary	Strategic Recomm endations
------------------	--	-----------------------------------	--------------------------------------	--------------------------------------	------------------------------------	------------------------------------	--	--	----------------------	-------------------------------

Despite policy pushes, a large portion of incidents (Orange) still occur without body camera footage. This gap hinders the Oversight Board’s ability to audit ‘Unarmed’ or ‘Undetermined’ threat cases.

RQ1: Outlie..	RQ2: White and Black civilians ar..	RQ2: Younger demographics fa..	RQ2: The gender gap is overwhel..	RQ2: 'Attack' levels vary by de..	RQ3: Firearm prevalence dicta..	RQ3: Mental health crises acc..	RQ3: Fleeing does not always correl..	RQ3: Body camera usage remains in..	Executive Summary	Strategic Recommendations
---------------	-------------------------------------	--------------------------------	-----------------------------------	-----------------------------------	---------------------------------	---------------------------------	---------------------------------------	-------------------------------------	-------------------	---------------------------

- 1. **Geography:** The South and West require the most resource allocation.
- 2. **Demographics:** Racial disparities persist, with younger minority men at highest risk.
- 3. **Situation:** Mental health and 'Other' weapon calls present the immediate opportunity for non-lethal policy reform.

RQ1: Outlie..	RQ2: White and Black civilians ar..	RQ2: Younger demographics fa..	RQ2: The gender gap is overwhel..	RQ2: 'Attack' levels vary by de..	RQ3: Firearm prevalence dicta..	RQ3: Mental health crises acc..	RQ3: Fleeing does not always correl..	RQ3: Body camera usage remains in..	Executive Summary	Strategic Recomm endations
------------------	--	-----------------------------------	--------------------------------------	--------------------------------------	------------------------------------	------------------------------------	--	--	----------------------	-------------------------------

To City Council: Increase funding for mental health co-responder units in high-density districts.

To Oversight Board: Mandate 100% body camera usage for all patrol units and audit all 'Undetermined' threat level cases.

THANK YOU!
